## WHY CHOOSE nepSA solutions?

The nepSA solutions **KitstiK™** is a revolutionary, purpose-designed solution for small cell wireless infrastructure.

**A KitstiK™** = Radio, Antenna, 3-section FRP pole and all ancillary cabling packed in a 15-foot, custom-designed and reusable container.

### A KitstiK™ pole is:

- Beautifully engineered, designed and constructed
- Lighter-than-wood poles install in half the time at half the cost
- Available in a variety of configurations and lengths, from 26 to 38-feet tall
- FRP poles do not corrode, rust or rot and are impervious to birds, insects and water
- Non-conductive, fire-resistant construction
- Built to ANSI/TIA-222-G standards to withstand high winds; will flex and not break
- Life expectancy: 60+ years - with NO maintenance required on composite poles
